ASBESTOS LABORATORY SERVICES

Environmental Microbiology Laboratory, Inc. (EMLab™), the leader in the field of microbial analysis, now provides **asbestos laboratory services** for the analysis of asbestos in air (NIOSH 7400 Method) and bulk (EPA Method 600/R-93/116) samples. Let EMLab™ handle your asbestos samples for you so you can take advantage of the many benefits EMLab™ provides, such as:

- Download reports online 24/7**
- Nationwide network of MicroLabs and Service Centers
- View **project status online 24/7**
- Use your existing EMLab project manager for both mold and asbestos work
- Save time and effort by sending **all of your samples to one lab**
- EMLab's unmatched service for your asbestos work
- Free shipping** to the laboratory

EMLab™ is accredited by the AIHA EMLAP and the California Department of Health Services ELAP programs, and is ISO/IEC 17025 compliant (contact laboratory for Scope of Accreditation). EMLab's analytical staff includes only degreed and highly trained analysts, the majority with advanced degrees. EMLab's scientific staff is headed by Dr. Harriet Burge, the company's Directory of Aerobiology and Chair of EMLab's Scientific Advisory Board. Dr. Burge is widely considered to be the leading expert in Indoor Air Quality and Mold Analysis, and has served as a member of seven National Academy of Sciences committees.

You can expect the same commitment to quality and accuracy in our asbestos services that you have come to expect from EMLab™ in traditional microbial analysis. With over 30 years experience in mold testing and bioaerosols analysis, EMLab™ helped pioneer today's indoor air quality industry. Today, EMLab™ remains dedicated to the success of its clients and its mission of being the benchmark for analytical quality, service and testing in the industry. Further information is available www.EMLab.com or by calling 866-888-6653 (MOLD).
