

PRESS RELEASE

Nation's Leading IAQ Laboratories Merge to form EMLab P&K

April 9, 2007

San Diego, CA — Two of the largest and most respected Indoor Air Quality (IAQ) laboratories have merged to form a single company providing analytical services nationwide. EMLab™ and Aerotech P&K have joined forces forming EMLab P&K. The transition to the new name is expected to begin early this summer.

"In addition to the unified brand, we're enthused by the increased number of services, improved online capabilities, and increased technical resources we will be able to provide our clients as we integrate the capabilities of our organizations," said David Fetveit, Aerotech P&K General Manager.

EMLab™ Chairman Dave Gallup added, "The focus is on providing better service and quality to our clients, as it always has been. By selecting the best practices from the former companies, we expect to see material improvements that clients will appreciate."

The newly formed EMLab P&K will continue to perform high quality mold, asbestos and bacteriology analysis with an emphasis on customer service, high quality analysis, and strong technical capabilities. Resources for the combined entities include over 50 employees with a minimum of a bachelor's degree and nearly 30 employees holding advanced degrees. Additionally, EMLab P&K will have 20 locations across the country; nearly all are accredited by programs that include AIHA EMLAP, NVLAP, and additional state certifications and licenses.

About EMLab™

EMLab™ is recognized as one of the leading commercial indoor air quality laboratories in North America with over a decade of experience, specializing in the analysis of air and surface samples for asbestos, bacteria, and fungi. Their goal is to provide the highest quality analysis and service in the industry. Clients include industrial hygienists, laboratories, hospitals, public health departments, professional service firms and other IAQ professionals. EMLab™ has helped pioneer today's IAQ industry with MoldRange, MoldScore and over 100 publications and abstracts. EMLab™ provides LabServe™, a 24-hour, online customer service, which controls data management, custom report formatting, access to secure archives of projects and reports.

About Aerotech P&K

Aerotech P&K's mission is to deliver quality, timely, and legally defensible data to clients around the world. Aerotech P&K is the world's leading mold, *Legionella* and IAQ laboratory, offering fast turnaround times and advanced analyses as well as a full line of IAQ and IH equipment and supplies to IAQ consultants, Industrial Hygienists, Mold Inspectors, environmental engineers, medical professionals, legal professionals, and governmental agencies. Aerotech P&K also provides online services for tracking

projects and ordering supplies and has an unparalleled project management program to ensure each client receives excellent customer service.
