

Report for:

Mr. Quality Control
EMLab P&K (QA)
1150 Bayhill Drive
Suite 100
San Bruno, CA 94066

Regarding: Eurofins EPK Built Environment Testing, LLC
Project: Sample Report
EML ID: 1322714

Approved by:

Dates of Analysis:
Dust characterization: 02-06-2015

Technical Manager
Murali Putty

Service SOPs: Dust characterization (EM-MY-S-1044)

All samples were received in acceptable condition unless noted in the Report Comments portion in the body of the report. Due to the nature of the analyses performed, field blank correction of results is not applied. The results relate only to the samples as received and tested.

Eurofins EPK Built Environment Testing, LLC ("the Company"), a member of the Eurofins Built Environment Testing group of companies, shall have no liability to the client or the client's customer with respect to decisions or recommendations made, actions taken or courses of conduct implemented by either the client or the client's customer as a result of or based upon the Test Results. In no event shall the Company be liable to the client with respect to the Test Results except for the Company's own willful misconduct or gross negligence nor shall the Company be liable for incidental or consequential damages or lost profits or revenues to the fullest extent such liability may be disclaimed by law, even if the Company has been advised of the possibility of such damages, lost profits or lost revenues. In no event shall the Company's liability with respect to the Test Results exceed the amount paid to the Company by the client therefor.

Client: EMLab P&K (QA)
C/O: Mr. Quality Control
Re: Sample Report

Date of Sampling: 02-04-2015
Date of Receipt: 02-06-2015
Date of Report: 02-06-2015

PARTICULATE CHARACTERIZATION - DIRECT MICROSCOPIC EXAMINATION REPORT

Location:	1
Comments (see below)	None
Lab ID-Version‡:	6040514-1
	Percentage (%)†
Algae	
Amorphous debris	3
Animal hair	5
Cellulose fibers	25
Crystalline particles	
Epithelial (skin) cells	25
Fern, moss, etc.	
Fungal spores	1
Glass fiber	
Human hair	
Hyphal fragments	1
Insect parts	
Mites	
Other (wood, trichome, etc.)	
Pollen	10
Starch particles	20
Synthetic fibers	10

Comments:

† The percentages reported are approximate values.

Reported percentages for each identifier are visual estimates of surface area occupied relative to the surface area of all other debris components in the sample preparation. For example, if the sample preparation only contains Epithelial (skin) cells and Fungal spores and both of these debris components occupy approximately the same total surface area relative to each other, the reported percentage for Epithelial (skin) cells would be 50% and the reported percentage for Fungal spores would be 50%.

The limit of detection is 1%.

Particle types listed without a percentage or data entry were not detected during the course of the analysis for the respective sample.

Interpretation is left to the company and/or persons who conducted the field work.

‡ A "Version" indicated by "-x" after the Lab ID# with a value greater than 1 indicates a sample with amended data. The revision number is reflected by the value of "x".
